PROFESSIONAL SUMMARY

Tech-enabled Business & Operations Associate with experience across government digital systems, data analytics, and large-scale program execution. Worked with MPSeDC and NITI Aayog on automation, reporting systems, and policy-driven insights impacting public sector operations. National-level hackathon winner with strong execution, stakeholder management, and problem-solving capabilities.

EDUCATION

Jagran Lakecity University — BCA (Hons.)	CGPA: 9.1/10 (2023–2026)
St. Joseph Co-ed School — Class XII (CBSE)	85% (2022–2023)
Sankalp Public School — Class X (CBSE)	85% (2020–2021)

FELLOWSHIPS/INTERNSHIPS

M.P. State Electronics Development Corporation (MPSeDC) Aug 2025 – Oct 2025; Feb 2026 – Present

Technology Intern

- Orchestrated automation of departmental reporting through the CM Pragati Dashboard, reducing manual consolidation effort by~40%. Architected WhatsApp-based dissemination workflows, accelerating inter-departmental reporting cycles
- Collaborated on the strategic evaluation of Madhya Pradesh’s space-tech ecosystem alongside EY stakeholders
- Co-facilitated execution of IndiaAI Impact Summit 2026 (New Delhi), coordinating stakeholders across policy, industry, and AI research ecosystems

Rajya NITI Aayog (Govt. of M.P.) June - July 2025

Policy & Data Analytics Intern

- Analysed multi-department datasets to derive governance insights for policy-level decision-making
- Restructured website information architecture to enhance accessibility and public usability
- Supported inter-department administrative reporting frameworks

IntelliSquare Aug – Nov 2024

AI & Technology Consultant

- Engineered conversational logic improvements for AI chatbot systems, enhancing user engagement
- Streamlined bot validation processes through structured functional testing
- Assisted in campaign analytics and execution strategy

PROJECTS

JLU Orbit – Academic Networking & Research Platform

- Developed a campus-focused academic platform to enable structured knowledge sharing and research collaboration
- Designed features for blog publishing, academic portfolios, and submissions. Built a Research Hub simulating real-world academic workflows and deployed within the School of Science & Technology

Municipal Inventory & Asset Management System (Hackathon Finalist – Acropolis University, Indore)

- Designed and implemented a centralised municipal asset management system to streamline inventory tracking across departments
- Reduced manual tracking inefficiencies through structured database architecture. Introduced role-based access controls and maintenance logs for transparency. Enabled real-time asset tracking for improved operational decision-making

Transparify – Transaction Monitoring & Audit Platform (National Winner)

- Engineered a transaction monitoring system to enhance financial transparency and detect data inconsistencies
- Developed checksum-based validation mechanisms for transaction integrity. Built a structured audit trail logging for improved fraud detection

STRATEGIC LEADERSHIP & NATIONAL ENGAGEMENTS

- Directed a 35-member cross-functional team to execute Lakecity Hack 2025, a 500+ participant state-level innovation hackathon
- Orchestrated operational execution of the Ujjain Mahakumbh National Hackathon in collaboration with MPSeDC
- Coordinated logistics and stakeholder engagement for IndiaAI Impact Summit 2026, New Delhi
- Secured 2nd Position – National Level, Accathon 2.0 (Forensic Accounting Hackathon), Nirma University
- Awarded Chancellor’s Scholarship for Academic Excellence

TECHNICAL COMPETENCIES

- AI & Data Skills: Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Workflow Automation, Semantic Search
- Technical Skills: Python, MERN Stack, REST APIs, LLM Integration (OpenAI API), SQL, Vector Databases (FAISS, Pinecone)
- Tools: LangChain, LlamaIndex, LangGraph, Hugging Face, Git, Postman
