PROFESSIONAL SUMMARY

Tech-enabled Business & Operations Associate with experience across government digital systems, data analytics, and large-scale program execution. Worked with MPSeDC, NITI Aayog, and PIF (Directorate of Economics & Statistics, Govt. of MP) on automation, real-time dashboards, and policy-driven insights impacting public sector operations. National-level hackathon winner with strong execution, stakeholder management, and problem-solving capabilities.

EDUCATION

Jagran Lakecity University — BCA (Hons.)	CGPA: 9.16/10 (2023–2026)
St. Joseph Co-ed School — Class XII (CBSE)	85% (2022–2023)
Sankalp Public School — Class X (CBSE)	85% (2020–2021)

FELLOWSHIPS/INTERNSHIPS

Pahle India Foundation (PIF) — Directorate of Economics & Statistics, Govt. of MP May 2026 – Present
Tech Intern

- Conducted a pilot Training Need Assessment (TNA) study in Indore and built a live dashboard to visualize results in real time
- Scaled the pilot into a statewide real-time TNA dashboard covering all 52 districts, fetching live employee assessment data and visualizing skill- and division-wise comparisons
- Enabled self-serve, downloadable division-wise TNA reports directly from the dashboard

M.P. State Electronics Development Corporation (MPSeDC) Aug 2025 – Oct 2025; Feb 2026 – Apr 2026
Technology Intern

- Orchestrated automation of departmental reporting through the CM Pragati Dashboard, reducing manual consolidation effort by ~40%; architected WhatsApp-based dissemination workflows to accelerate inter-departmental reporting cycles
- Collaborated on the strategic evaluation of Madhya Pradesh's space-tech ecosystem alongside EY stakeholders

Rajya NITI Aayog (Govt. of M.P.) June – July 2025
Policy & Data Analytics Intern

- Analysed multi-department datasets to derive governance insights for policy-level decision-making and restructured website information architecture for accessibility
- Supported inter-department administrative reporting frameworks

IntelliSquare Aug – Nov 2024
AI & Technology Consultant

- Engineered conversational logic improvements for AI chatbot systems and streamlined bot validation through structured functional testing
- Assisted in campaign analytics and execution strategy

PROJECTS

DES Training Need Assessment (TNA) Dashboard — Govt. of Madhya Pradesh (Directorate of Economics & Statistics)

- Built a real-time, statewide dashboard covering 52 districts to assess employee training needs, scaled up from a successful Indore pilot study
- Fetches live data and visualizes skill-wise and division-wise comparisons; enables self-serve download of division-level TNA reports

JLU Orbit — Academic Networking & Research Platform

- Developed a campus-focused academic platform for structured knowledge sharing, blog publishing, academic portfolios, and submissions
- Built a Research Hub simulating real-world academic workflows, deployed within the School of Science & Technology

Municipal Inventory & Asset Management System (Hackathon Finalist – Acropolis University, Indore)

- Designed a centralised municipal asset management system with role-based access controls, maintenance logs, and real-time tracking to reduce manual inefficiencies

Transparify – Transaction Monitoring & Audit Platform (National Winner)

- Engineered a transaction monitoring system with checksum-based validation and structured audit trail logging for improved fraud detection

STRATEGIC LEADERSHIP & NATIONAL ENGAGEMENTS

- Directed a 35-member cross-functional team to execute Lakecity Hack 2025, a 500+ participant state-level innovation hackathon
- Orchestrated operational execution of the Ujjain Mahakumbh National Hackathon in collaboration with MPSeDC
- Co-facilitated execution of IndiaAI Impact Summit 2026 (New Delhi), coordinating stakeholders across policy, industry, and AI research ecosystems
- Secured 2nd Position – National Level, Accathon 2.0 (Forensic Accounting Hackathon), Nirma University
- Awarded Chancellor's Scholarship for Academic Excellence

TECHNICAL COMPETENCIES

- AI & Data Skills:** Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Workflow Automation, Semantic Search
- Technical Skills:** Python, MERN Stack, REST APIs, LLM Integration (OpenAI API), SQL, Vector Databases (FAISS, Pinecone)
- Tools:** LangChain, LlamaIndex, LangGraph, Hugging Face, Git, Postman
